[Scalable Exact Set Cover / Routing Clustering for ~20,000 Points with Length Constraints](#)

I'm working on a large-scale combinatorial optimization problem that combines aspects of exact set cover and length-constrained routing. Problem Description I have ~20,000 points (nodes), eac...

Hello World!

This is a collaboratively edited question and answer site for **professional and enthusiast programmers**. It's 100% free.

Got a question about the site itself? [meta](#) is the place to talk about things like what questions are appropriate, what tags we should use, etc.
